LEARN WHAT’S NEW IN IEEE 1584-2018 and NFPA 70E-2018

November 16-20, 2020
Orlando, FL

Embassy Suites by Hilton Orlando Downtown

EasyPower, state-of-the-art Power System Analysis Software!
Hands-On with Arc Flash & Protective Device Coordination

Covering the completely revised IEEE 1584-2018 and latest changes in NFPA 70E-2018

EasyPower’s training course is tailored for engineers and designers who want to learn new skills or polish existing skills in the application of the EasyPower software suite for power system studies and design.

The Arc Flash session on Days 4 and 5 will cover the all new arc flash calculation standard IEEE 1584-2018 and provides the essential information needed to understand the impact and how to apply it.

This training class will use the latest version 10.3 of EasyPower and cover important recent changes and updates to the program.

The training reference manual provided includes necessary theory and extensive notes. This training caters to both the novice and experienced power system engineer. No prior experience with EasyPower is needed.

Days 1 & 2 – EasyPower Hands-On 1.2 CEUs
Monday, November 16 - 7:30 a.m. to 4:30 p.m.
Tuesday, November 17 - 8 a.m. to 4:30 p.m.

Topics Include:
» EasyPower Overview
» EasyPower Functions and Features
» Hands-On Development of EasyPower One-Line and Database
» Motor Control Centers and Panel Schedules
» Application of EasyPower Short Circuit and Equipment Duty
» Overview of EasyPower Power Flow
» Sample Cases and Applications
» Scenario Manager

Day 3 – Protective Device Coordination with PowerProtector 0.6 CEUs
Wednesday, November 18 - 8 a.m. to 4:30 p.m.

Topics Include:
» Application of EasyPower PowerProtector for Protective Device Coordination Studies
» How to create time-current curves quickly and easily in EasyPower for both Phase and Ground Overcurrent devices
» How to easily adjust settings graphically and instantly see impact on arc flash levels
» Using EasyPower to perform Protective Device Coordination Studies
» Modifying the EasyPower library
» Learn how to use the Sequence of Events capability in PowerProtector
» Learn about optional Smart PDC feature that will automatically coordinate your system and verify proper equipment protection
Arc Flash Risk Assessment

Developing and implementing an ongoing arc flash hazard program which meets the new regulations noted in NFPA 70E, IEEE-1584, and the current OSHA Standard 29 can be challenging. Rule of thumb methods could result in both unnecessary worker exposures to hazards from under protection and significant lost plant productivity due to overprotection.

The industry has recognized the benefits of obtaining accurate arc flash hazard data. Consensus standards recommended that arc flash calculations be completed in conjunction with short circuit calculations and protective device coordination. The use of EasyPower Arc Flash can save companies thousands of dollars annually, per worker, in lost productivity.

Performing a study and applying labels is only one aspect of a true arc flash hazard program. A comprehensive corporate electrical safety program also includes development and implementation of the proper processes, procedures, documentation, and training programs. EasyPower can be used in developing a complete safety program.

Days 4 & 5 – Arc Flash Risk Assessment 1.0 CEUs

Thursday, November 19 - 8 a.m. to 4:30 p.m.
Friday, November 20 - 8 a.m. to 3:00 p.m.

Topics Include:
» Arc flash causes and impacts
» Latest requirements of NFPA 70E-2018 for arc flash safety
» Complete update on the all new IEEE 1584-2018 calculation method including comparison with previous IEEE 1584-2002 methods
» Explanation of all relevant arc flash settings and options in EasyPower 10.3 with special emphasis on changes related to the new IEEE 1584-2018
» Overview of Personal Protective Equipment
» What should be in an EasyPower model for an arc flash study
» Short Circuit Analysis for an arc flash study
» Equipment Duty Evaluation and why this is an essential part of any arc flash study
» Protective Device Coordination for an arc flash study
» Application of EasyPower ArcFlash for arc flash hazard determination
» Numerous hands-on examples covering all aspects of arc flash analysis, so you learn by doing
» Applying Scenario Manager to quickly and automatically evaluate unlimited number of operating conditions and find the worst-case arc flash at each location
» Learn EasyPower’s built-in capability to handle common arc flash reduction tools such as maintenance mode settings, zone selective interlocking, and differential relaying
» How to create, print and customize arc flash warning labels
» Arc flash hazard analysis with various system configurations including bus ties, generators, high impedance grounding, current limiting fuses and breakers, motor contribution, long feeders, etc.
» The course also includes a comprehensive manual
General Information

EasyPower conducts training at various locations throughout the United States to make it easy for you to attend at a manageable cost. Please note: No audio recording, video recording or photography is allowed during the training sessions.

Lodging & Transportation
Attendees are responsible for lodging and transportation to the seminar. For your convenience, EasyPower has reserved a block of rooms at the Embassy Suites by Hilton Greensboro, where the seminar will be taking place. This block of rooms will be available for a room rate of $169.00 per night USD (plus applicable state and local taxes) for seminar attendees, through October 16. Contact the Embassy Suites by Hilton Greensboro for reservations and mention “EasyPower” to receive our discount or use the link below to access EasyPower’s room block reservation site.

Embassy Suites by Hilton Orlando - Downtown
191 E Pine St
Orlando, FL 32801
Phone: 407-841-1000
Booking Link: EASYPOWER 2020

As you arrange for travel, please note that our seminar starts at 7:30 am on Monday morning and ends between 2:00 pm and 3:00 pm on Friday. Classes begin at 8 am and end at 4:30 pm on all other days.

Computer Requirements
This is a practical, hands-on seminar; you will need to bring your laptop. EasyPower does not provide laptops. If you need to rent a laptop, you may contact the hotel’s Audio-Visual Department. **The Wednesday before the seminar (November 11) you will be supplied with and required to install a temporary copy of EasyPower® training software on your laptop via download link; this will require admin rights are enabled on your laptop and you have access to the Internet.** We require that you use the training software, so you will have access to all the features available within EasyPower.

If you are a current EasyPower user with your own license on your laptop, you may opt to uninstall your company's copy of EasyPower, or simply plan to reinstall upon completion of the seminar. The seminar copy of EasyPower will not override or affect any other types of software on the laptop; however, if you have a personal copy of EasyPower loaded, it may affect some of those files. If any device library changes have been made to your personal copy, you will need to archive your device library before installing the seminar copy of EasyPower. **You will NOT need your hardware key for the training class.**

Minimum System Requirements
- CPU: Intel®-based computer with dual-core or higher processor
- RAM: 512 MB (2 GB recommended)
- Monitor: 1280 x 1024 or higher resolution monitor and video adapter
- Hard Disk: 1 GB disk space
- Mouse: Microsoft mouse or other compatible pointing device with spin wheel

Refreshments
EasyPower will provide continental breakfast, lunch, afternoon snack and beverages throughout the training.

*If you have special dietary requirements, please let us know by May 4.*

EasyPower Training Contact Information
Contact our training department at 503-678-9792 between 8 a.m. and 4 p.m. PST with your training questions, or email training@easypower.com.

**Package A:**
EasyPower Hands-On, Protective Device Coordination, and Arc Flash
November 16-20
Without Current Maintenance: $2,200.00
With Current Maintenance Discount*: $1,980.00
With Premium Maintenance Discount*: $1,100.00

**Package B:**
Protective Device Coordination and Arc Flash
November 18-20
Without Current Maintenance: $1,320.00
With Current Maintenance Discount*: $1,188.00
With Premium Maintenance Discount*: $660.00

**Package C:**
EasyPower Hands-On and Protective Device Coordination
November 16-18
Without Current Maintenance: $1,320.00
With Current Maintenance Discount*: $1,188.00
With Premium Maintenance Discount*: $660.00

Transportation and hotel room reservations are the responsibility of the attendee. Please contact the hotel directly for room reservations. **Reserve by October 16 to receive the EasyPower group discount.**

*EasyPower users with current regular maintenance or current Premium maintenance will receive the appropriate discounted rate on seminar registration fees. You will also qualify for the maintenance discount if you purchase EasyPower within seven days of seminar completion.

Substitutions and cancellations are allowed at no additional charge if EasyPower is notified prior to the registration closing date. Substitutions after the registration closing will incur a $100 administrative fee to cover the costs of course material and certificate replacements. For any cancellation received after the registration closing date, the attendee will incur a $500 administrative fee. No refund or seminar transfer will be issued without cancellation notice provided to training@easypower.com.

**NOTE:** No audio recording, video recording or photography is allowed during training sessions.
